

FACUNDO RIZZATO

Data Analyst | Automation | Python | SQL | Power BI

Buenos Aires, Argentina | facurizzato2012@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Engineering student focused on Data Analytics, Automation and AI-powered solutions. Experience building data-driven projects using Python, SQL, PostgreSQL and Power BI, including data generation, cleaning, analysis, visualization and automation workflows. Interested in applying data and automation to improve business processes and decision-making.

TECHNICAL SKILLS

Data & Analytics: SQL, PostgreSQL, Python, Pandas, NumPy, Excel, Power BI, Data Cleaning, Data Analysis, Data Visualization, KPI Development

Automation: Python Automation, APIs, Web Scraping, n8n, Workflow Automation

AI & Backend: LLM APIs, Gemini API, Django, FastAPI, Docker

Developer Tools: Git, GitHub, VS Code, Antigravity, Cursor

PROJECTS

E-Commerce Analytics & Business Intelligence Platform

Python | Django | PostgreSQL | Pandas | Power BI | NumPy | openpyxl | Render

- Built a production-deployed e-commerce platform backed by PostgreSQL, combining transactional functionality with an analytics and business intelligence layer.
- Developed a statistical synthetic-data engine using Zipf, Pareto and log-normal distributions to generate realistic product demand, customer purchasing behavior, pricing and gross-margin patterns.
- Simulated 24 months of historical transactions with seasonal demand patterns, inflation and variable margins; implemented memory-bounded batch ingestion to generate 10,000+ records within 512 MB RAM.
- Built a Pandas ETL pipeline that extracts relational transactional data, transforms multi-table datasets and calculates financial metrics including total cost, net profit and profit margin, exporting formatted multi-sheet Excel reports for BI workflows.
- Developed an admin analytics dashboard with real-time revenue KPIs, cart abandonment analysis and best-selling product metrics, alongside configurable data simulation and three-month forecasting.
- Integrated a Gemini-powered assistant capable of answering questions about the catalog, business policies and the application's data architecture.

AI Agent & Analytics Microservice

Python | FastAPI | Redis | Gemini API | Docker | REST API | SSE | GitHub Actions | Render

- Designed and deployed a modular FastAPI microservice that decouples AI inference and analytics workloads from the main e-commerce application.
- Implemented a multi-agent architecture with specialized agents for e-commerce, analytics and portfolio use cases, using heuristic/semantic intent classification for automatic request routing.
- Built a natural-language analytics interface capable of retrieving KPIs, sales analysis, conversion-funnel metrics and forecasts, with JWT-based access control for restricted business data.
- Implemented Redis-backed conversational memory with TTL expiration and an in-memory fallback, plus real-time LLM token streaming through Server-Sent Events (SSE).
- Developed a zero-dependency JavaScript chat widget using Shadow DOM, allowing the AI service to be embedded into external web applications.
- Automated infrastructure health monitoring with GitHub Actions and implemented resilient LLM request handling with exponential backoff and jitter.
- Implemented a 90-test automated test suite covering API endpoints, agents, Redis/Django integration, SSE streaming, schemas and infrastructure.

Power BI E-commerce Analytics Dashboard

Power BI | PostgreSQL | DAX

- Built an interactive business intelligence dashboard connected to PostgreSQL to monitor e-commerce performance and business KPIs.
- Developed executive, product and customer analysis views covering revenue, orders, product performance, customer behavior and other key metrics.
- Designed interactive filters and visualizations to support exploratory analysis and business decision-making.

EDUCATION

Computer Engineering

Universidad Nacional de La Matanza (UNLaM)

2025 – Present (Expected graduation: 2029)

Relevant coursework: Databases, Programming, Algorithms, Statistics, Software Engineering

CERTIFICATIONS

AI for Data Analysis from Google — Coursera (2026)

Django Web Development — Coderhouse (2022)

ADDITIONAL INFORMATION
